

ERRATA

In keeping with our publishing standards, CACC takes immediate steps to correct any inaccuracies brought to our attention. The online version of the Report Card is changed and these notes identify any differences from materials available on the date of release (February 10, 2009).

- HPV Vaccination Programs, page 8. In the text describing Table 3, the incidence of cervical cancer for NS and PEI was reversed. The table was and is accurate.
- Sticker Shock, page 33. The figure shown for acetylsalicylic acid has been revised to reflect expenditures on all brands and generics. Previously, the number reflected only the expenditure for one brand, Asaphen (the brand identified by IMS for this list).
