CACC Editorial Advisory Committee Dauna Crooks, James Gowing, Darwin Kealey, David Saltman and Colleen Savage

Special thanks to all the cancer patients and patient-centred cancer groups who offered their insight and support for this publication. Many other organizations and individuals generously share their experiences and ideas with us all year, including cancer agencies, policy and research institutes, think-tanks, senior officials in health ministries, elected officials and health professionals from coast to coast.

A note of appreciation to Cohn & Wolfe for a generous amount of pro bono public relations work on our behalf.

BOARD OF DIRECTORS

Larry Broadfield (Vice Chair) BScPharm, MHSc, is Manager of the Systemic Therapy Program, Cancer Care Nova Scotia. He is a Fellow of the Canadian Association of Hospital Pharmacists and a member of numerous professional associations. He has been a member of the Standards Working Group of the Canadian Partnership Against Cancer and has authored many publications on systemic therapy guidelines.

Dauna Crooks (Chair) RN, DNSc, is the former Dean of the Faculty of Nursing, University of Manitoba as well as a former Associate Professor at both the University of Toronto and McMaster University (retired). Dauna is also a member of seven professional organizations and has numerous grants and publications.

James D. Gowing (Past Chair) BA, MB, BS, FRCPC, founded the community cancer clinic in Cambridge, ON and established the National Conference on Community Cancer Clinics. He has been an advocate for community cancer care and cancer control throughout his 40-year medical career.

Darwin Kealey (Past Chair) BA, MA, is a former executive public servant and international entrepreneur with extensive advocacy experience.

Kong Khoo MD, FRCPC, is a Medical Oncologist based in the Southern Interior of British Columbia in Kelowna.

Jaime McDonald PharmD, is a pharmacist at the Children's Hospital of Eastern Ontario in Ottawa. She also sits on the Research Ethics Committee at the Montfort Hospital. She completed her Doctor of Pharmacy at the University of Toronto and is currently completing a Master of Science degree at Laval University.

Joseph Ragaz MD, FRCPC, is a Senior Medical Oncologist, Clinical Professor, Faculty of Medicine, School of Population and Public Health, University of British Columbia, Vancouver, and an Adjunct Clinical Professor, Medicine and Oncology, McGill University, Montreal, QC.

David Saltman (Vice Chair) MD, PhD, FRCPC is a Medical Oncologist in Victoria, BC. His current interests include cancer advocacy, mutational analysis in lung cancer, and smoking prevention and cessation strategies.

Elizabeth (Liz) Whamond has a long and distinguished history in the Canadian cancer community. In 2001, Ms. Whamond was one of the founding members and is currently the Past Chair of the Canadian Cancer Action Network. She is also the CCAN representative on the Cancer Journey Advisory Group of the Canadian Partnership Against Cancer.

The Cancer Advocacy Coalition welcomes nominations to the Board of Directors. Send your CV and a letter describing your interests to our Nominations Committee at the main email address.

BOARD SUPPORT

Daniel Gillespie BSc, is a graduate of the University of Toronto and an independent consultant to the CACC, providing executive support and research services to the Board. Colleen Savage is an independent consultant serving as CEO.

Disclaimer: Cancer Advocacy Coalition of Canada (CACC) provides the Report Card on Cancer in Canada for general information related to current events and topics relevant to cancer in Canada. While CACC makes best efforts to ensure the accuracy and timeliness of the information contained in the Report Card on Cancer in Canada the information is taken from various public and private sources so that no responsibility can be assumed by CACC for the accuracy or timeliness of this information. The opinions expressed in the Report Card on Cancer in Canada are those of the individual authors of individual articles and material. Their views do not necessarily reflect the views of CACC.

Warning: CACC's Report Card on Cancer in Canada should not be used for the purpose of self diagnosis, self treatment or as an alternative to medical care. If you have any concerns arising out of the information contained in CACC's Report Card on Cancer in Canada, you should consult your own physician or medical advisor. If you suspect you have cancer, seek professional treatment immediately.

SUBMIT AN ARTICLE

The Cancer Advocacy Coalition welcomes submissions from authors who wish to publish original articles on issues that are important to patients, showcase innovation in the organization and delivery of care, identify gaps and solutions, explore the potential benefits and guidance required for emerging technologies, evaluate the effectiveness of cancer policies and practices, or tell the story of your own cancer experience, particularly with a rare cancer, a new technology or an innovative service arrangement.

About the Cancer Advocacy Coalition of Canada

The CACC is a full-time, registered, non-profit cancer group dedicated to advocacy, public education, policy analysis and evaluation of health system performance. The CACC is not a charity and operates on unrestricted grants from sponsors based on guidelines that ensure the organization's autonomy. The CACC publishes Canada's only independent evaluation of cancer system performance, the annual Report Card on Cancer in Canada. The Board of Directors is comprised of unpaid volunteer health professionals, business executives and patient advocates from across the country.

Our Vision for the Cancer System

An effective, comprehensive, evidence-based cancer system that offers Canadians the best chances for preventing and treating this disease, and addresses the emotional, physical and financial needs of patients and survivors.

Our Goals: to benefit cancer survivors and all Canadians

- Consistent adherence to best practices in cancer care and prevention, making best use of financial and human resources
- Accountability to patients, survivors and taxpayers
- Transparency of decisionmaking, priority-setting and performance measurement
- Reduction of the emotional, physical and financial distress associated with a cancer diagnosis
- Access to best practices in disease prevention and timely, effective treatment options
- Increased awareness of prevention choices
